- Data Structures and Algorithms
- DBMS (Data Base Management System)
- Computer Networks
- Python
- Object Oriented Programming
- Internet and Web Technology
- Design and Analysis of Algorithms
- Discrete Mathematics

Projects

https://sohamjain125.github.io/Portfolio/
You can visit my website to see the project
Amazon Frontend
I have created an Amazon clone using HTML and CSS, which I closely mimic the design and functionality of the original Website. The project involved building HTML Page a static one, designing user interfaces, and implementing features such as photo uploads, comments, and likes. Through this project, I gained a deeper understanding of front-end web development, including the use of CSS frameworks, responsive design principles.

Weather Website
I have created a Weather showing Website using HTML, CSS and JavaScript; It shows the Weather of all the city after entering the city name. I have use open Weather API to implement it. Through this project I learned how to connect APIs' and how to use it.

Interests

Chess	**Problem-Solving**	**Traveling**
Chess (Played at district for my school and i was having a rating of 1860 at lichess and chess.com too)	Problem-Solving (Solved around 160 Leet code problems and continue.... 3star in cpp in hacker rank)	Love to travel and visit new places.

Hackathon and Competitons

Indore, India	**NMIMS**
	Participated in NMIMS hackathon which was base on AI and ML and our team presented the idea of identifying the type of clothes which was there in the database by training the model. We used Python for training the model and learned some concept of Tensor flow too.
Indore, India	**Smart India Hackathon**
	My team had been selected from the college for Smart India Hackathon.
